Designed for single person lower body immersion. The design is based fully on the technology that is incorporated into our iBody bath which is now the accepted world standard mobile ice bath and has been for the past 5 years. Our iCool iBody pool is the best selling mobile ice bath in the world and is in use in 47 countries. Our iCool iBody pool is now the accepted world standard mobile ice bath.

The iSprint is designed to perfectly meet the requirements of cyclists, long distance runners and triathletes for fast uncomplicated leg muscle recovery, anywhere anytime. Light to carry, quick to set up and fast to cool using any size iCool chiller or even just ice.

It has been well established by sports scientists that immersing legs in an ice bath immediately following a race or hard training is enormously effective in preventing next day aches and pains and speeding the recovery of over stressed soft tissues, muscle cells and ligaments. It can be even more effective if it is followed by a warm bath or shower and then repeated. A complete iCool contrast therapy system is even better.

The iSprint is so portable and easily carried that it makes it possible to do this on the spot, anywhere the race or training session ends and that’s the whole point, the sooner your legs are in the ice water the more effective the treatment.

Internal Dimensions: 150 Cm Long X 43 Cm High X 45cm Width. Outer Dimensions: 180 Cm Long X 45 Cm High X 85 Cm Width. Litres: 170. 4 x single air chambers including bottom mattress for extra comfort and drain valve. The iSprint comes with very substantial wheeled travel bag, a high volume foot air pump and a repair kit.

The iSprint TWIN comes with very substantial wheeled travel bag, a high volume foot air pump and a repair kit.

Designed for two person lower body immersion. The design is based fully on the technology that is incorporated into our iBody bath which is now the accepted world standard mobile ice bath and has been for the past 5 years. Our iCool iBody pool is the best selling mobile ice bath in the world and is in use in 47 countries. The new iSprint TWIN uses the same high quality heavy duty materials as the iBody.

The iSprint TWIN has the same features as the new iSprint but with extra strength at both ends and an extra head rest to allow 2 athletes to use it at once with one seated at each end. Perfect for quick recovery when you have several athletes needing recovery at the same time, yet it’s still light and portable enough to carry with you to anywhere the race or training finishes.

Internal Dimensions: 153 Cm Long X .61 Cm High X .45cm Width.Litres: 230. 4 x single air chambers including bottom mattress for extra comfort and drain valve. The iSprint TWIN comes with very substantial wheeled travel bag, a high volume foot air pump and a repair kit.
The Original Icebath Bath
Used by the world’s top athletes Since 2004

Since 2004, the original portable ice bath, now the world standard, because it is a perfectly optimised in every way to allow athletes all over the world to achieve perfection in icebath and contrast therapy recovery and training sessions, anywhere, anytime. There is nothing to compare with an iCool.

Starting with a single inflatable ice bath at the 2004 Olympic Games we have taken on board every lesson learned from the use of our pools all over the world to design the 2013 range.

Our very popular ultra portable inflatable pool has become the recognised world standard because it’s perfectly balanced size and shape for fast cooling and proper body immersion, yet small and light enough for carry on baggage. The latest models are much tougher to withstand repeated use by large athletes and are manufactured from stronger new material similar to that used in tough boat tenders.

We have added doubled welded seams in the parts under the most stress, an inbuilt mattress for comfort and insulation and fast and convenient snap fittings for water inlet and outlets. New user friendly inflation valves make set up quick and easy. iCool inflatable ice baths include a foot pump, patch repair kit, safety cover and now a heavy duty carry bag with wheels.
